

Summary of the project:

The Biit Financial aid allocation tool is web based application. The purpose of this application is to provide financial aid to the Merit based students as well as Need Based Students. This application is developed on dot net core MVC. This application contains three panels

- 1)Admin Panel
- 2)Committee Panel
- 3)Student Panel

1-Admin Panel:

The Login of the admin is “Biit-Admin” and the password is “haris-051”. This panel contains the settings which contains the policy for the merit based as well as need based students and the budget details. This panel contains Merit based, need based student list and committee list. The admin has the authority to short list the students on a definite policy in each semester. It can accept, reject the students and also add the committee members. It has the authority to review the profile of students and view the recommendations provided by the committee members.

2-Committee Panel:

The Committee Panel contains the list of those Need based students who had applied for the need based scholarships in every semester. The Committee members has the authority to review the history of the students as well give the recommendations to the students.

3-Student Panel:

The Registered student on the first login will create a profile on the step by step interactive and after that they can apply for the scholarship in each semester. If the student want to update his profile he simply need to login to his account and edit his information and then save it.

4-Parent Panel:

The parent panel is for the parents to get information of their wards who had applied for the need based scholarships the login id for the parents is the same as their arid numbers.
